

Smart Shipper Gel Pack First Test Suggestions.

1) Place your disposable liner in the Smart shipper to keep the Smart Shipper clean.

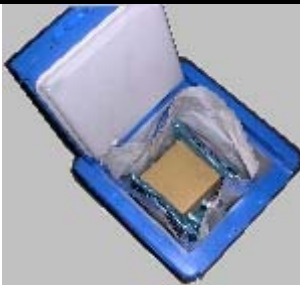

2) Place a gel pack in the bottom of the disposable liner.

3) Place your product in a box to protect it from damage.

4) Place your box of product in the center of the Smart Shipper.

5) Place gel packs around your box of product.

6) Place a gel pack on top of your box of product.

7) Fold in and seal your disposable liner.

8) Insert filler as needed to secure the entire load, and prevent shifting during shipment.

Removing your Product

Without opening the disposable liner, remove it from the Smart Shipper. Then open the disposable liner and remove your product.

These are first test suggestions only.

Your product, the type of refrigerant used, and shipping conditions all effect the way a product needs to be packed. ***Test this.*** Then modify to suite your specific needs.

Instructions, and information to aid in the use of Smart Shipper containers is available at...
